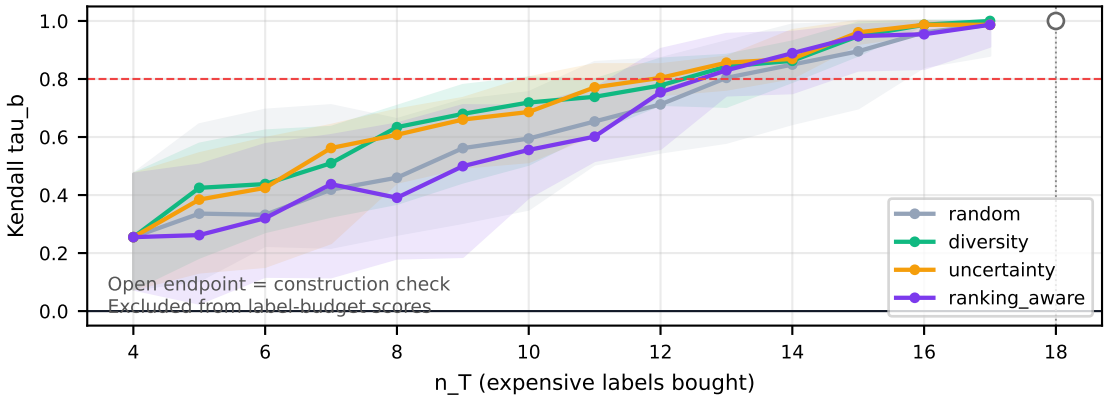
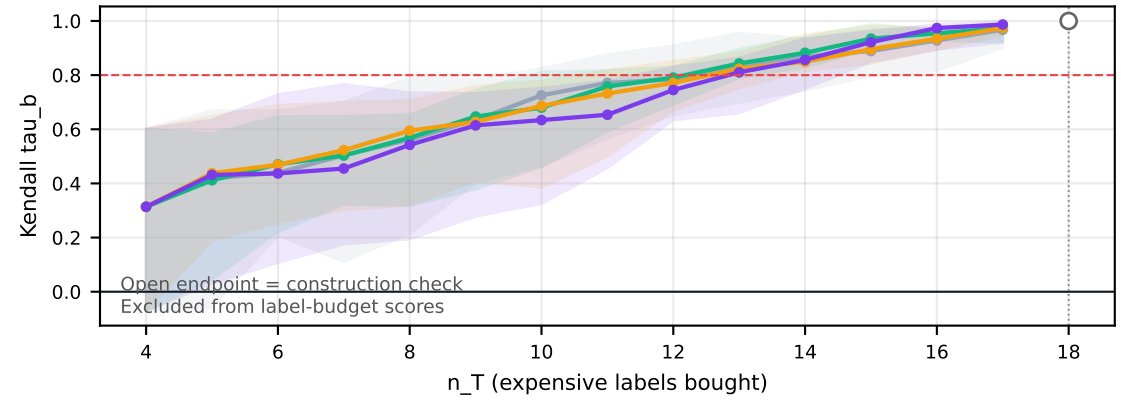
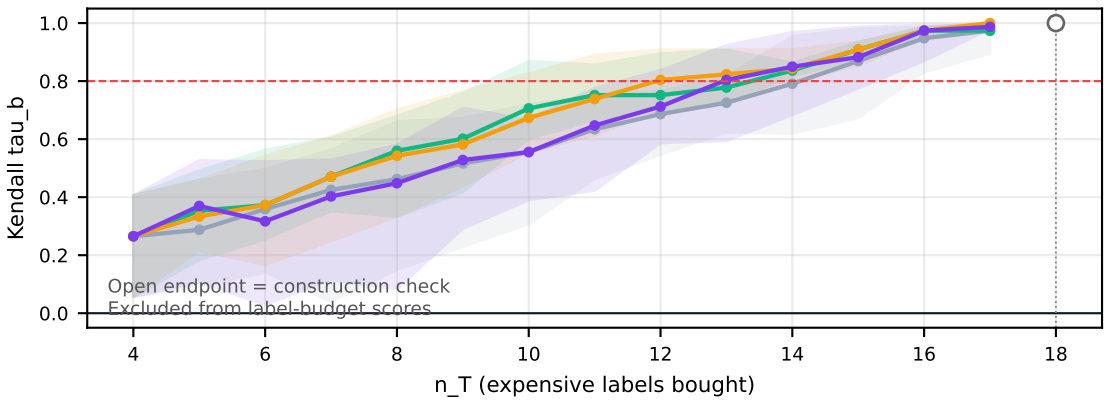
M / oxidation (pool n = 18)



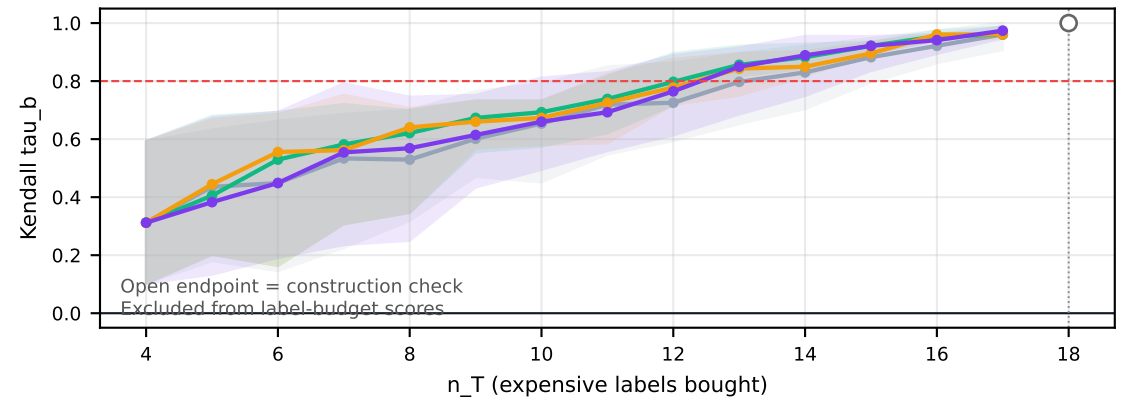
M / reduction (pool n = 18)



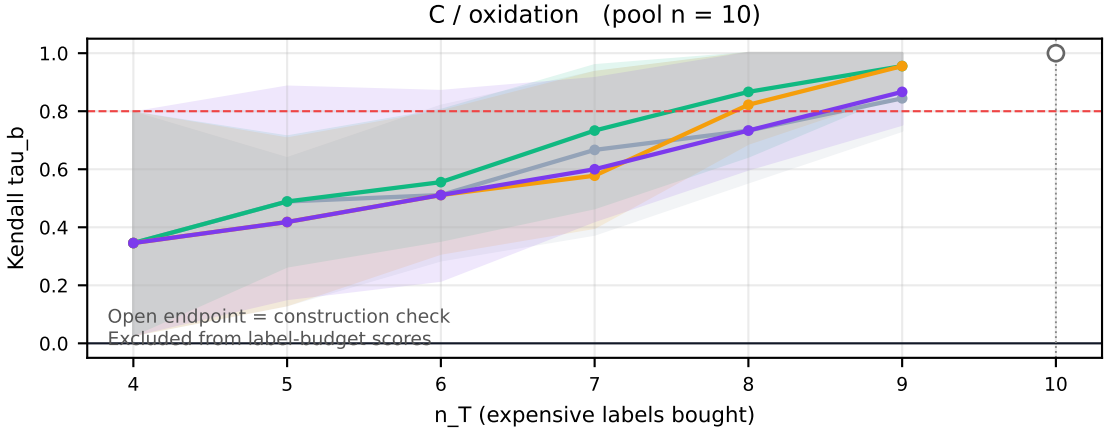
E / oxidation (pool n = 18)



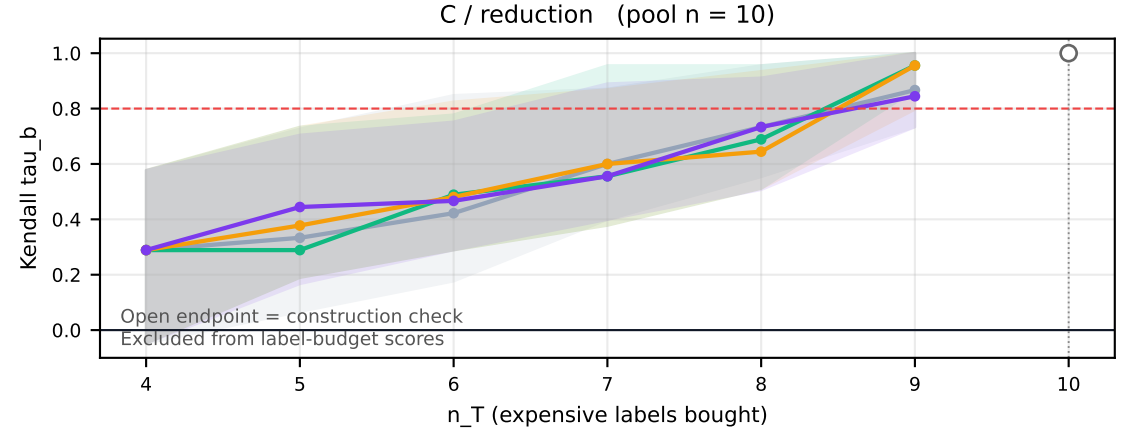
E / reduction (pool n = 18)



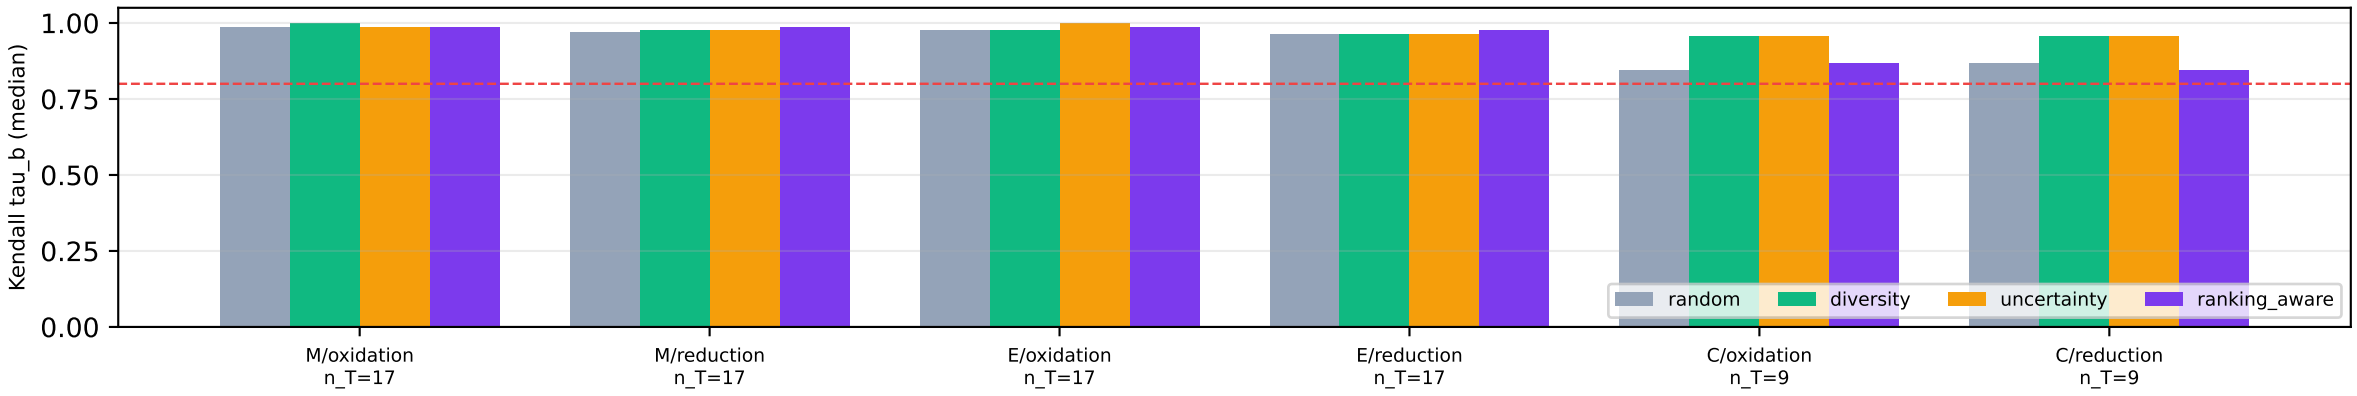
C / oxidation (pool n = 10)



C / reduction (pool n = 10)



(g) Last non-trivial point: one expensive label short of the full set



Pool interpolation only; internal tau_b threshold 0.80 is not externally calibrated.
